Standard video controls along with prv/next controls when playing playlists

Surprise me videos will be a non-stop video playlist based on the mood selected by the user. However, unlike other videos, surprise me will not have any landing page and the video will simply start playing. The user will never be able to see what video will be played next!

This page will have posters of top most show on the network. These pages may open in a browser window or a special HTML page.

For special shows like KBC, which have their own micor-site, the design will be decided by the sponsor(s). Hence these pages are out of scope of this project. For other shows, we've already provided a standard template.
